PhD COURSE IN STATISTICS
Department of Statistical Sciences

Thesis presentation – XXX cycle
October 10, 2017
Room Cucconi

13.00

Prince John

Finite Dirichlet Mixture Models for the Classification and Detection of New Classes of Variable Stars

Supervisor prof. A. Brazzale

14.00

Ehsan Kharati-Koopaei

Classification Approaches in Neuro Science: A Geometrical Point of View

Supervisor prof. L. Finos

15.00

Umberto Simola

Developments in Approximate Bayesian Computation and Statistical Applications in Astrostatistics

Supervisor prof. A. Brazzale

16.00

Sifiso Vilakati

Inference Following Two-Stage Randomization Designs with Survival Endpoints

Supervisor dott. G. Cortese
