

Presentation of research topics 2021

Date	Speaker	Time	Where	Topic
June 7	Mauro Bernardi (Univ. Padova)	14.30-16.30	On line	Approximate Methods for Statistical Learning
June 8	Leonardo Egidi (Univ. Trieste)	15.00–17.00	On line	Open Issues in Bayesian Statistical Modelling
June 10	Alessandra Minello (Univ. Padova)	10.00-12.00	On line	CHILD (Collecting Hasbugical Information on Life and Death). Using historical big data for the analysis of population changes.
June 11	Stefano Mazzuco (Univ. Padova)	09.00-11.00	Room Cucconi	SELECT: Unfolding the SEcrets of LongEvity: Current Trends and future prospects. A path through morbidity, disability and mortality in Italy and Europe.
June 11	Stefano Campostrini and Emanuele Aliverti (Univ. Venezia)	11.00-13.00	Room Cucconi	Statistical issues and advanced models in health population studies
June 11	Mauro Bernardi (Univ. Padova)	14.30-16.30	On line	Beyond MM Optimization
June 15	Luigi Grossi (Univ. Padova)	10.00-12.00	On line	Statistical Analysis of Energy Markets
