PRA (IRIS): the best place ...

- # to increase the visibility of research conducted at the University of Padova;
- # to increase the relevance of scientific contributions in international consideration and encourage the comparison of ideas and positions;

- # to increase efficiency in obtaining data and documents, thanks to specialized indexing;
- # to centralize document management in a single collector and thereby avoid the dispersion of resources in local repositories;

- # to guarantee the integrity of documents and their appropriate description, regardless of technological and instrumental changes;

- # to respond to funders requirements, since in many cases they expect the submission of research products to open access repositories.
