

Paola Annoni has an extensive professional experience as applied statistician, particularly in the area of measurement of latent phenomena in the economic and social sciences. She currently works at the European Commission in the Policy Development and Economic Analysis Unit of the Directorate General for Regional and Urban Policy (Brussels). She is responsible for the European Regional Competitiveness Index (RCI), The European regional Social Progress Index (EU-SPI) and the European Quality of Government Index, in cooperation with the University of Gothenburg. She is also responsible for econometric modelling for regions' development and monitoring with focus on the different thematic aspects of European cohesion policy. Before joining the European Commission, she worked at the University of Milan – Department of Business, Economics and Statistics and, prior to that, as environmental physicist at CESI Ricerca in Milan.

Paola studied at the University of Milan. She has a M.Sc. in Physics, and a Ph.D. in Statistics.
